George Matete holds a PhD in Veterinary Public health and a Master of Science in Veterinary Pathology and Microbiology from the University of Nairobi. He combines unique skills as a development practitioner and researcher with a focus on livestock value chains, trade, marketing policy development, capacity building, institutional reform and economics.

George presents a wide range of rural development experience spanning over twenty (20) years in Kenya and Somalia. This has been in livestock surveillance and disease control systems, resilience and disaster management framework in pastoral communities, livestock trade and marketing sector, institutional policy reforms in the veterinary public health sector, livestock product certification and quality management systems. In addition, George has strengths in programmes development, fund raising and participatory research, strategic planning and policy development both in Kenya and Somalia. Some of the programmes he has managed, received donor funding from the EC, UKAid and other regional multilateral and bilateral funding agencies.

His career accomplishments include a mention in the Marquis who is who in Science for pioneer work including reversal of blindness in *Trypanosoma Brucei brucei* infected dogs, and Sleeping sickness and HIV co infections in western Kenya. As part government of a Government of Kenya project, George spearheaded a reference pilot-test on electronic livestock identification and traceability system for pastoral beef production system. George Matete is a publishing author.
