

Information for International Students

Location of the Department of Veterinary Pathology Microbiology and Parasitology

The Department of Veterinary Pathology Microbiology and parasitology is located off Kapenguria Road, 14 kms to the Northwest of Nairobi in the College of Agriculture and Veterinary Sciences

Catering and Accommodation

The College has a dedicated hostel block (picture) for accommodation of International students at reasonable rates. The Catering and accommodation services are run by the University of Nairobi Student Welfare Authority

Climate and Weather

Nairobi the capital city of Kenya where the College of Agriculture and Veterinary Sciences is located, exhibits one of the best climates in the country. It has a moderate climate, tempered by its high elevation and tends to be less hot than the rest of Kenya. As the city is near the equator there is little variation between the seasons and generally people talk about wet or dry seasons as opposed to summer, winter, spring or autumn. However, summers, between November and February, are warm and pleasant, with temperatures hovering around the 77°F (25°C) mark. Winter days, between June and August, are mild to cool, with cold evenings when the temperature can drop to 50 °F (10 °C). The rainy season in Nairobi is during late summer and into autumn, when it is often cloudy and damp, but rainfall is seldom very heavy. The drizzliest months are March to May and October to December..

Requirements for International Students

All foreign students are required to register with the University of Nairobi Center for International Students
